DETAILED ACTION

- 1. Examiner initiated an interview with Mr. Joseph B. Agusta (Reg. No. 52,547) on December 9, 2004 regarding the pre-existing restriction requirement in the parent applications 09/471,217 & 09/896,687. In the parent applications, the applicant has already agreed with the restriction requirement and made elections without traverse. Furthermore, the applicant agreed that the claims 55-64 discloses subject matter that are not patentably distinct from the parent Patent No. 6,457,073, and that the applicant further agree to submit a Terminal Disclaimer to make the case in a better condition for allowance. The applicant is also reminded to cancel the, non-elected without traverse, claims 43-48 & 52-54 to make the case in a better condition for allowance.
- 2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 55-64 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1-39 of U.S. Patent No. Application/Control Number: 10/782,201

Art Unit: 2182

6,457,073. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims 55-64 read on and/or substantially identical to the teachings of the Patent No. 6,457,073.
